Detailed Action

Objection to the Abstract

The abstract of the disclosure is objected to because it exceeds 150 words in text. Correction is required. See MPEP § 608.01(b).

Claims Rejection - 35 U.S.C. 112, second paragraph

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 3 and 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- (1) In claims 3 and 7, "that can be engaged with and disengaged from each other" is incorrect. Exactly what can be engaged with and disengaged from each other? As the disclosed invention is understood (see lines 11-18 on page 6 of the specification), the detent teeth surface 6a on the surface detent mechanism 6 engages with and disengages from the detent teeth surface 6b formed in the detent piece 6c. The detent teeth surfaces 6a on the surface detent mechanism 6 do not engage with and disengage from each other as now claimed.

(2) In claim 9, the limitation cited therein is incorrect. It is the pivoting bolt that has a head portion with a knurled surface and a diameter larger than the width of each of the branching portions (see lines 5-9 on page 6 of the specification).

Claims Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Carey (U.S. Patent No. 703,334).

Carey discloses a replaceable saw comprising a saw blade (25), a support member (17), a blade replacing mechanism (26), a handle (15) and a rotational position adjusting mechanism (16,18,19) as claimed.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kolodner et al. (U.S. Patent No. 2,435,225).

Kolodner et al. disclose a replaceable saw comprising a saw blade (10), a support member (12), a blade replacing mechanism (15), a handle (13) and a rotational position adjusting mechanism (16-21) as claimed.

Indication of Allowable Subject Matter

1. Claims 2, 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

- Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35
 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
- 3. Claim 6 is allowed.
- 4. Claims 7-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
